About This Game

Summary

rFactor is a realistic easily extendable racing simulation from Image Space Incorporated. It offers the latest in vehicle and race customization, great graphics, outstanding multiplayer, and the height of racing realism. rFactor features mixed class road racing with ultra realistic dynamics, an immersive sound environment and stunning graphics.

You can race against a field of AI cars, or in multi-player mode against others. The simulation supports a full day-night cycle. In multi-player mode, driver swaps are also supported, allowing you to run even full 24 hour endurance events. Everything can be customized by the community, including adding new tracks and cars, and a wealth of add-ons are available on-line.

Features

Physics

- Updated 15 degrees of freedom physics engine

- Advanced tire modeling

- Support for 4-link rear suspension

- Engine boost modeling

- Complex aerodynamics

- Head physics, cockpit vibrations, detailed bump modeling

- All-new track-specific terrain data file system

Graphics/Sound

- DX9 advanced graphics engine

- Real-time day/night transitions

- Projected headlights for nighttime driving

- Adjust player and opponent volume ratio

- See the apex with the Look Ahead slider

- Adjust your seat and mirror while in the driver's seat

- Updating real-time scoring towers

- Expanded and enhanced gauge and LCD features for vehicle cockpits

- Improved loading times

- Updated sound engine

- Changing engine sounds based on upgraded vehicle performance

Gameplay

- Career mode with upgrades that affect the vehicle's appearance, performance, and sound

- Define AI opponent types, strength and aggression

- Races can be lap based, time based or both

- Vehicle upgrade system

- Vehicle economy including mileage

- Ambient and track temperature changes throughout the race

- More configurable keys than you can shake a stick at

- Multiple Racing Series with vehicle and circuit filters

- Grid editing

Camera/Replays

- Full screen monitor and ability to rewind

- Freely move camera from any position including the ever famous exclusive ISI Swingman

- Spectator mode

- Greatly enhanced replay system including clip splicing

- Move, duplicate or delete replay clips while assigning camera movements to each

- Export replays to AVI files defining compression and size options

Multiplayer

- Completely new multiplayer engine

- Built in race statistics reporting to web based RaceCast system

- Built in friends list

- Server bookmarks

- Dedicated server, including single click option

- Native voting system

- Add AI to multiplayer games

- Built in IRC chat

- Boot and ban player lists that can be passed around

- Security checks to combat potential cheating

Open Architecture

- Extensive support for modders

- Easy to use customizable multi-language support

- Define a league schedule

- Rules to simulate different types of racing

- Completely customize your controller

- Drop in new vehicle liveries

Vehicles

- 2006 Formula IS – High Performance Open Wheel (Video)

- 2005 Hammer – Full Bodied GT

- 2005 Howston – Full Bodied GT

- National Stock Car – Stock Car

- Panoz – Full Bodied GT

- 2005 Rayzor – Rally Turbo

- 2006 rF3 – Quick and Nimble Open Wheel

- 2005 Rhez – Small FWD Sport Compact

- 2006 Rhez – Small FWD Sport Compact

- 2005 rTrainer – Low Speed Open Wheel

- 2005 Venom – Rally

- 2005 ZR – Affordable High Performance Sedan

Circuits

- Barcelona – Permanent Road Course

- Brianza – Permanent Road Course

- Essington Park – Permanent Road Course

- Jacksonville Speedway – High Banked Superspeedway

- Jiading – Permanent Road Course

- Joesville Speedway – Paved Short Track

- Lienz Festival – Country Roads (Video)

- Mills Metropark – Permanent Road Course with two layouts

- Montreal – Permanent Road Course

- Northamptonshire – Permanent Road Course

- Nuerburg – Permanent Road Course

- Orchard Lake – Banked Tri-Oval with Infield Road Course

- Sardian Heights – Street Circuit with two layouts

- Toban Raceway Park – Permanent Road Course with four layouts

Title: rFactor

This game is hands down the best racing game there is. It beats the F1 series by Codemasters, Gran Turismo etcetera. The best part about it is that the modding community is huge, there's mods for everything. Want to drive on a melon? Download a mod to drive on a melon. Almost every racing class is in there.

One downside is that the game isn't as popular as it was years ago. Let us hope that the popularity will come back now it's on Steam!. Project D mod.. this game is really good if you find mods for it that make it better like if you want car mods or track mods but its a 10/10 rating for me. The greatest racing simulation ever!! ISI is pure genius.. The Best Car Simulator Of All Time
Pros:
Nice Graphics
Millions Of Mod On Internet
Various Styles Of Racing, From Nascars To Formulas
Cons:
Need Workshop
10/10. get it, play it, have fun racing. I come back to rFactor time after time because it is so solid, does it have the ultra realistic graphics...NO, but I get lost in it anyway. The long list (the longest I bet) of mods and tracks is breathtaking...

Still love it, still rack it up more than any other sim and I have ACC and PC2 and all the rest.

AAAAA Rating in my book. Ignore my played hours time, i bought the hard copy back in the day and to be honest this is still great fun. If you would rather have the experience over visuals this game is for you, remember this game is old, If not Assetto, PC will be more your thing.

This is one of the best modded racing games of all time, so loads of good quality content. However the price tag of £19 is a bit steep, i got this for less than £5 in the sale and it is definetely worth it if you can grab it in a good sale.

Multiplayer almost dead, you will be able to get a race on a server somewhere though. Single player not bad at all and fun.

Overall 8\10 if bought for under£5,stilll good fun. Nice rFactor to Steam! A lot of mods Cars and Tracks, Awesome sim racing :). Just another one of thos racing games that if you approach a bend too fast the only thing that will happen is that you will go straight ahead instead of turning. No amount of steering or braking will alter your path, once it decides you were going too fast, it will continue to go in a straight line until you hit something or if there was enough room your speed slowly decreases to almost stopped. If you like uncontrollable car games, fantastic, buy it!

I love project cars 2 and mostly race the ford gt mkiv vintage cllass b. trouble is there are only 4 carrs in vintage b, and a limited number of tracks. So i've returned to rFactor 1 to mainly enjoy the Historx mod. the cars in that mod are still stunninglly beautifull even by todays standards. the ferrari 330 p4 one example that is amazing and the sound incredible. Plus i can race wherever i want. there is a ton of different cars. anyting you dont like from force feedback to gearboxes can be edited and changed to your liking. dont edit if you want to raceonline as will cause mismatch. with new windows 10 backwards compatibility includes direct x9 so no need to run compatiblility mode any more I justuse the 4GB patch and create a desktop shortcut and change settings for all users to run as administrator and after the target path .exe leave one space then type "+fullproc" "highprio" for command line options and you will get a nice framerate. Jade se autkiem fajny klimacik // Driving se autkiem (a car) cool climacik atmosphetr. This game is this only thing that can say its as good as NR2003. just dont waste your money like i did.. Honestly, rFactor is hands down one of the best titles ever, ISI has made a master piece! The mod support for this game is beyond any game. You can literally find any mod, from any cars, tracks you could possibly want, want fantastic sounds, great force feedback, with realfeel. 10/10.. Very flexible and easily moddable game.. 8/10, honestly one of my favourite games on PC to drift and race in. Physics are sometimes dodgy but it only adds to the fun in most occasions. Better than Project Cars overall. Graphics and sounds are 10 years old, of course. But it's the kind of game that will grow on you. And there are literaly hundreds of great mods around. Try HistorX for starts. Then everything CTDP and Virtua_LM did. Then everything else. You'll sure find something to love. Amazing how a game this old can still be so damn great.. Still better than need for speed. Amazing game, other people say "trash sim, Don't buy"

It's an old game of course it won't have the same graphics or gameplay as newer games like Assetto corsa or Project cars, I use this game for drifting, it's amazing with the Project D mod, there are what seems like millions of mods for this game, if you want racing mods they have them, if you want drift mods they have them, there are Graphic mods like ENB if you don't like the old graphics, there are even truck mods lmao

I got this game on sale for $7 and it's an amazing deal
Highly recommend this game if you are looking for a racing game with millions of mods.

[PROS]
Millions of mods
Awesome customization
fun community
Wide range of cars to use if you don't like modding
many awesome tracks
Awesome gameplay

[CONS]
Slightly outdated graphics
Game has a few bugs
would be better if they paid for licensing for car manufactors

Those are my opinions about this game and the pros and cons that came to my head
Hope this helped!
